

Reg. No.: 218EC1851

Name :

VIT[®]Vellore Institute of Technology
(Deemed to be University under section 3 of UGC Act, 1956)

Continuous Assessment Test – I – Feb 2024

Programme	: B.Tech (ECE/ECM)	Semester	: WS 2023-24
Course	: IoT Domain Analyst	Code	: BECE352E
		Class Nbr	: CH2023240500972
			CH2023240500975
			CH2023240500977
			CH2023240500979
Faculty	: BERLIN HENCY V B. NAGAJAYANTHI CHANDRAMAULESHWAR ROY SOUMYA RANJAN MAHAPATRO SRITAMA ROY	Slot	: TC1
Time	: 90 Minutes	Max. Marks	: 50

Answer ALL the questions

Q.No.	Question Description	Marks
1	Describe the steps involved in developing for Online Shopping Customer Relationship Management (CRM) software. Discuss how CRM allows customers to visualize and interact for improvement in the earlier versions, provide valuable feedback for refinement and improvement. [5] Apply a suitable model to develop the CRM software and provide justification for the same.[5]	[10]
2	How does the Spiral model facilitate risk management in the development of the eKart application? Discuss the iterative nature of the Spiral model and how it allows for early identification and mitigation of risks specific to eKart's requirements, such as scalability, security, and user experience. Provide examples of potential risks and explain how each iteration in the Spiral model addresses them.	[10]
3	What is Exploratory Data Analysis (EDA) and briefly discuss its role in the data analysis process. Describe three common visualization techniques used in EDA. [5] Provide specific examples of situations where each type of visualization would be useful. How does correlation analysis contribute to EDA? Illustrate with an example dataset. [5]	[10]
4	Discuss three common techniques for handling missing data. Provide examples to illustrate each technique. [5] Explain the importance of domain knowledge in feature engineering. Provide a scenario where domain knowledge significantly influences the choice of features.[5]	[10]
5	Imagine you have a dataset with missing values. Describe three different strategies for handling missing data, and discuss the advantages and disadvantages of each approach. [5] Provide a real-world scenario for each strategy. [5]	[10]
